TUCSON, AZ, October 25 – “Caught on Tape” Explosive Press Conference event presenting shocking recordings of Arizona hospital executives discussing coordinated plans to restrict fluids and nutrition for hospitalized COVID patients, suppression of all visitation for COVID patients while in hospital, denial of vital medicines and more. Actual prisoners in America are given more rights than COVID patients in America's hospitals.

Join us Wednesday October 27 at NOON Eastern Time for "Stop the Shot! Caught on Tape..." Video Press Conference live-streamed by Life Site News. For a link to participate, email Info@TruthForHealth.org.

[Elizabeth Lee Vliet, MD](#), President and CEO of the Truth for Health Foundation, a 501(c)(3) public charity, moderates the Press Conference, featuring Attorney and Patient Advocate Ali Shultz, exposing Arizona hospital executives' collusion harming patients.

Attorney [Lauren Martel](#), who focuses on Constitutional and civil rights advocacy, describes abusive behaviors toward hospitalized COVID patients, and hospitals' neglect of medical care leading to multiple patient deaths in South Carolina hospitals. Whistleblowers have also uncovered different cycle threshold standards for PCR tests for vaccinated vs unvaccinated ER patients leading to *higher false positive rates in unvaccinated patients*.

Shultz and Martel are members of the Foundation's Legal Advisory Council headed by Attorney Tom Renz. All are assisting the Foundation's medical team in the trenches dealing with hospital abuses as they help family members desperate to get their loved ones *out of the hospital to save their lives*.

LifeSite co-founder John-Henry Westen will provide introductory remarks. *Presenters include [Dr. Peter McCullough](#), [Dr. Bryan Ardis](#), [Attorney Thomas Renz](#), and family of patients who died after being denied requested medical treatments*. Shocking medical tyranny stories show how COVID patient's rights are violated daily, discriminated against, abused psychologically, and held in isolation with chemical and physical restraints while life-saving care is denied.

Truth for Health Foundation attorneys and physicians continue their exposé of horrific hospital violations of human rights, including violations of the Geneva Convention codes, established following World War II to prevent abuses of prisoners:

- Coercion to use Remdesivir for all COVID patients, regardless of the risk of this drug for kidney damage and death.
- Restriction of fluids and nutrition that further impairs patient's lung function and oxygen delivery to critical organs.
- Manipulation and coercion for families to agree for patients to go on ventilators, which have added incentive payments and create huge profits for hospitals.
- Denial of anti-inflammatories, such as corticosteroids, which further damages lungs.
- Denial of anti-virals, antibiotics, and therapeutic doses of "blood-thinner" medicines.
- Denial of access to patients by family, pastors, priests, rabbis, and attorneys.
- Law enforcement used to deny access to hospital grounds for family, attorneys, and patients' own healthcare power of attorney agents.
- And so much more...

Courageous doctors and nurses risk their careers, their licenses, livelihoods and even their lives as they courageously speak out to inform the public with this crucial information.

Be sure to tune in at Noon ET Wednesday September 22 on LifeSiteNews.com livestream. Go to www.TruthForHealth.org. Sign up and donate to support our efforts to fight Medical Tyranny in all its forms. *Join our Crusade of the Voiceless. We are SILENT NO MORE.*
