I have been doing Integrated Medicine since 1984. Licensed since 1970. Doing Nutrition, Wellness Care & Non-linear Scanning (BioStar) with bioresonance for health. I do not take patients unless they are willing to get well! No insurance since they 'forbid' helping patients and demand drug care only! Wake up Americans! Your body wants to be healthy & well so why do you stay with doctors employed by insurance to keep you sick for their profit? Come get a scan, find out what is really wrong and how to get your health back on track. All health problems start with an emotional wound or conflict but the discovery will help you be well! Coming to Hawaii? This is a wonderful place to visit, have a scan and learn how to be well in the healing island of Hawaii.

Affordable, Quality, Virtually 24/7 Care Provided At Your Convenience! We operate on a fee-based membership structure with transparent pricing and no surprises. Forgoing the traditional medical model in favor of the direct primary care model allows Dr. Schneider the ability to spend more time with each of his patients, and members of Concierge Health Network are never charged an office visit charge or co-pay. Offering virtual establishment and virtual routine office appointments for those suspected of having COVID or those who have COVID.

**Integrative pediatrics  
Portland, Oregon**

Contact: 503-643-2100 (only for patients who live within 50 miles of the office)  
<https://www.integrativepediatricsonline.com>  
We currently are a medical home - required to be able to take most insurances - therefore to become a patient and be seen you need to live within 50 miles of our office and have an insurance that we can take. In some cases, we can accept cash payment. We have CLIA certification/waiver to run rapid (15 minute) COVID-19 tests to see if you are infected with SARS-CoV2 and if you are ill you would not be in the main office space until proven to be negative for COVID-19. We then can do a complete evaluation and take care you as we normally would do.

All Covid patients are provided televisits after initial interview and scheduling. COVID testing is not performed in our office but is helpful for treatment guidance and recommended if suspected. Treatment is tailored to age, history and not solely dependent on active symptoms. Prevention of later complication is a critical element of our approach. We also give early supportive care to symptomatic individuals on a case-by-case basis. No insurance accepted as payment though we provide paperwork and online data for filing.
